

B11: Objective Assessment of Mild TBI

Assessment of Mild TBI in Animal Models

**Jonathan Lifshitz, Ph.D.
Spinal Cord & Brain Injury Research Center
University of Kentucky
Lexington, KY 40536**

Speaker Objectives

At the conclusion of this presentation, the participants will be able to:

1. Explain the importance of neurological, rather than biomechanical, measurements of traumatic brain injury severity;
2. Accept the conclusion that functional damage, rather than anatomical destruction, may mediate chronic neurological symptoms;
3. Appreciate that functional damage may have neuronal, vascular, astrocytic and/or microglial origins.
