

NNS 2010 Academic Sponsor Package

The 2010 National Neurotrauma Symposium, including the AANS/CNS Section on Neurotrauma and Critical Care, will be held at the Paris Hotel in Las Vegas, Nevada on June 14-17, 2010.

The National Neurotrauma Symposium provides the unique opportunity for neurotraumatologists to exchange ideas and advance the field. The symposium depends on the support and attendance from academic centers across the country and around the world.

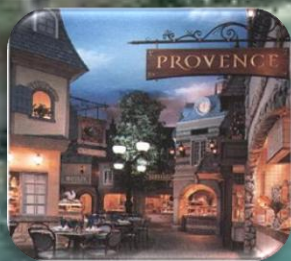

For the 28th Annual Symposium, academic centers will have the opportunity to participate in the meeting through the Academic Sponsor Package. As the natural extension of corporate sponsorship, the Academic Sponsors Package is tailored to suit the needs of institutions dedicated to the discovery and treatment of CNS injury.

The centerpiece of this endeavor will be an Academic Center consisting of poster boards and tables in clusters of eight participating institutions. For a minimum \$3,000 contribution, each Academic Center would receive:

- **One (1) 8' poster board with shallow skirted table in Poster viewing area**
- **Access to prominent Job Board**
- **Custom ribbons for name badges to identify attendees from your Academic Center**
- **Access to Center Director/Administrator Breakfast to discuss management successes**
- **One (1) complimentary delegate registration & conference bag**
- **Recognition as Academic Center Supporter in program and on website**

The Symposium is the premier scientific event for clinicians and researchers in the field of neurotrauma, presenting state of the art approaches and breaking research. Traumatic brain injury (TBI) is the number one cause of death in young adults and together with spinal cord injury is a major determinant of disability; both diseases incur high socio economic costs both in the acute treatment phase and in the long term due to loss of productive life years.

Important new scientific developments will be presented in plenary and breakout sessions, oral and poster presentations. Controversial issues will be addressed in round table discussions and pro-con debates. The Symposium will bring together an estimated 700+ scientists and clinicians from all over the world.
