

Postdoctoral Position in Dr. Rodney Ritzel's Lab

Department of Neurology & The BRAINS Research Laboratory

Position Description:

Our research focuses on neuro-immune interactions in brain injury and aging, with special emphasis on identifying prognostic biomarkers of neurodegenerative disease and preclinical validation of novel therapeutic targets.

Qualifications:

- PhD or MD with 3-4 years of training in Neuroscience, Immunology, Molecular/Cell Biology, Pharmacology, and/or a related field.
- Experience in experimental brain injury, rodent surgical procedure, and molecular biology techniques is required.
- Additional desirable experience includes histological preparation, immunohistochemistry, confocal microscopy, flow cytometry, and/or behavioral testing.

To Apply: Please send letter of interest, your contact information, CV, and the names and email addresses of 2-3 references to: Dr. Rodney Ritzel (Rodney.M.Ritzel@uth.tmc.edu).
